

Holly Overview Spring 2

This half term in Holly Class we are focusing on 'Plants':

We will be continuing to look at our sensory story each day, where we will use a multisensory approach to build our focus and engagement. Within our stories we are focusing on using our communication boards to answer Blank Level 1 and 2 questions. All the children will be completing an activity at the table linked to our story.

This half term we are looking at the following books:

Each morning we also have a Maths session, where we use concrete resources to explore our learning, and a daily phonics session. For our phonics this term we will be focusing on writing our graphemes, looking at the sounds m, g, o, c whilst recapping the previous sounds we have learnt and practising our oral blending. This will complete the Little Wandle Phase 2 phonics. Children will be taking home a phonics book to read once a week.

Key dates

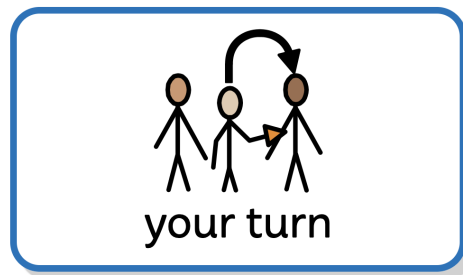

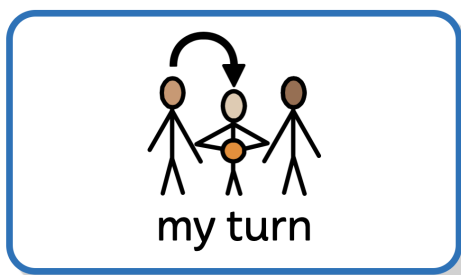

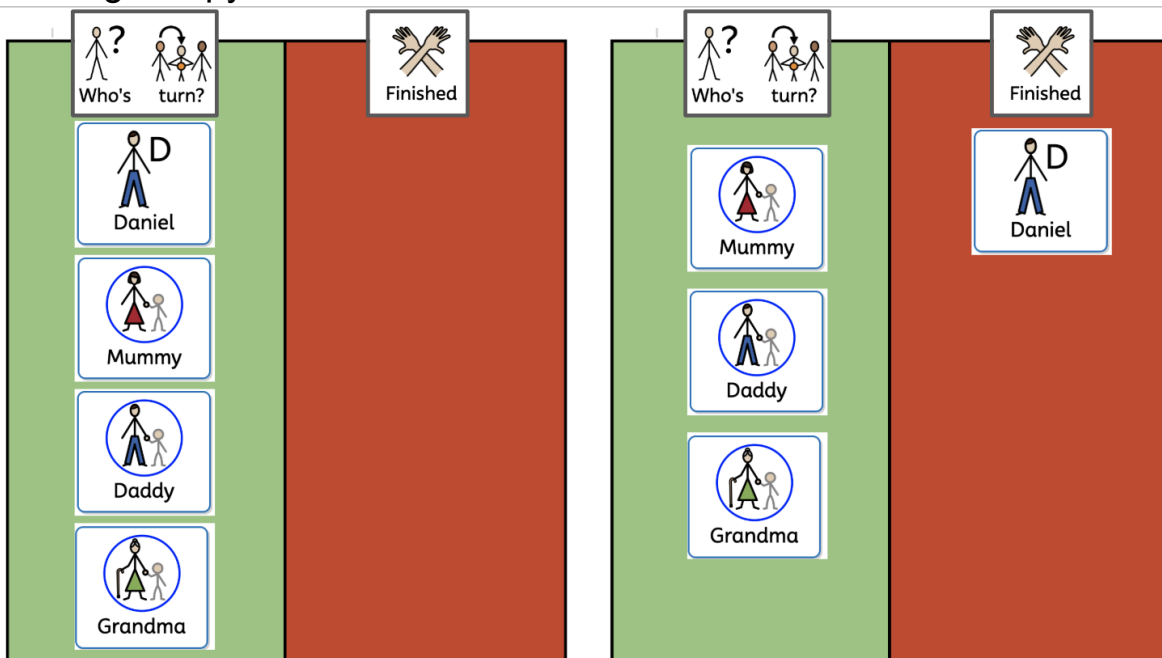

We will be having a visit to the Soanes Centre to complete their Environmental Explorers workshop.

This will be on the **10th of March at 10am.**

Please note that we are asking for a parent/ carer to accompany their child on this trip to ensure that everyone can access the workshop.

How to support your child at home with their learning this half term...

Practice turn taking at home with your child. This can be with games or everyday fun activities such as turn taking to eat a delicious cake. We are focusing on consolidating the children's understanding of turn taking with the use of visuals. We use the visual below, with pictures of the children and adults in the room. When the child's turn is finished it moves from green to red. We also use my turn and your turn visuals to help the children understand who's turn it is. Please share photos of your family with your child's class teacher so we can laminate them for you as well as providing a copy of the same visual.

Please remember to read this alongside your child's main class newsletter.
